
NV Gold to Commence Drilling at its Frazier Dome Gold Project and Prepares for Drill Program at its Slumber Gold Project

August 13th, 2019 - *Vancouver, British Columbia* – **NV Gold Corporation** (TSXV: NVX; US: NVGLF) (“**NV Gold**” or the “**Company**”) is pleased to announce that our technical team has arrived at the Frazier Dome Gold Project (“Frazier Dome”), all permits to commence its exploration program have been received, and drilling is expected to commence on August 14, 2019. The Company is also in final preparations for its drill program at its Slumber Gold Project (“Slumber”), which will commence immediately following the Frazier Dome program.

“We are excited for the upcoming drill program at Frazier Dome, which is focused on vectoring in on potential deep bonanza-grade feeder zones. The exploration program at Slumber, immediately following Frazier drilling, will be targeting multiple hidden structural gold targets that have been prioritized based on positive data and geological interpretation gained from a recent geophysical survey,” commented Peter A. Ball, President. “In addition, geological modelling is now being advanced at our high-grade Root Spring gold and silver project for a potential fall drill program, noting the recent positive results and summer site visit.”

The total of both exploration programs is planned to be up to 1,600 meters of reverse circulation (“RC”) drilling, which may be extended at a later date, pending results. Please refer to press releases dated July 18th, 2019, August 1st, 2019, for additional information on the geological models for both the Frazier Dome and Slumber Gold Projects.

The Company also wishes to announce it has entered into a Lease Agreement with the lessors of the Slumber Gold Project, as previously indicated in the May 30th, 2019 press release.

About NV Gold Corporation

NV Gold is a junior exploration company based in Vancouver, British Columbia that is focused on delivering value through mineral discoveries. Leveraging its highly experienced in-house technical knowledge, NV Gold’s geological team intends to utilize its geological databases, which contains a vast treasury of field knowledge spanning decades of research and exploration, combined with a portfolio of mineral properties in Nevada, to prioritize key projects for focused exploration programs.

On behalf of the Board of Directors,

John E. Watson

Chairman
